[Title of the Invention] Measurement device for detachable multiple zone  
sensor

[Abstract]

[Object] To cut away an individual measurement zone of a detachable  
sensor gently.

[Structure] The present invention relates to a cutting structure (44, 64, 66,  
68, 70) serving to cut away a detachable sensor 52 that has been introduced  
in a measurement device. The cutting structure includes a lever (44), a  
crank (66), and a blade (70) fixed to the lever.
